

# ULTIMATE XC

**Operation:** A reliable mortise lock for hinged security doors having a pivoting latch bolt that is retracted by operation of either an outside or inside lever. Closing the door causes an auxiliary bolt to release the latch bolt enabling it to enter the strike plate. Once fully extended it may be locked (or unlocked) from either side by key.

## Special Features:

- **Interior snib lever** for quick and convenient locking without the need to use a key.
- The **jimmy resistant strike plate** is designed to deform under attack to enable the strike plate to remain engaged with the bolt even as the door is jimmied away from the door jamb.
- A **pivoting latch bolt** hooks in behind a profiled strike plate to provide enhanced resistance to forced entry.
- **Australian** design and manufacture.

**Multipoint:** Ultimate XC may be connected to multipoint kits to provide three point locking. These kits provide a top and a bottom bolt, each connected to the main lock body by a steel cable. The remote bolts are activated whenever the door is locked by key or snib (see over page for details).

## Installation Features:

- Fits into **industry standard cut-outs**.
- Suits both left hand hinged and right hand hinged doors.
- **Fitting instructions** can be downloaded from [www.ausloc.com](http://www.ausloc.com)

**Finishes:** A range of powder coated finishes shown in Section 10 of this catalogue. Finishes include PSIL (powder-coated Satin Chrome look-alike).

- Keying:**
- AA8 5-pin double cylinders with a cam-stop (spring)
  - C4 or Gainsborough compatible keyways
  - can be keyed alike

Ordering Code	Ultimate XC - without Caretaker feature	Notes
ULTXC / colour	Ultimate XC standard	

## Multipoint Kits

### U-KIT

#### Straight bolts

Uses steel cables that provide quiet and reliable operation. Cables are only available in standard lengths.
